ABSTRACT

A method for directing a packet to a required bearer of a set of bearers. The method comprising the steps of:

- (a) receiving the packet;
- (b) checking if the packet is a fragmented packet and if it is,
- (c) checking if the packet comprises information related to 10 selection of the correct bearer and if it does,

forwarding the packet to the correct bearer

storing fragmentation related information contained in the packet

receiving second packet

15 forwarding said second packet to the correct bearer based on the fragmentation related information.

and if it does not, storing fragmentation related information contained in the packet

storing said packet;

20 receiving another packet containing information related to the selection of the correct bearer; and

forwarding another packet and the stored packet(s) to the correct bearer.
